

In the Capital Regional District

PUBLIC WATER WORKS!

Just ask waterworks maintenance operator Craig Kozak:

Craig takes pride in servicing the community by providing safe, potable drinking water. That's why he has been working for the regional district for the past 11 years.

Craig points out that "water does not magically appear at your tap - there is a lot of planning, organizing and hard work that goes into providing the safe clean water we have in Greater Victoria."

During the 25 years he has lived in the area, Craig has taken full advantage of the outdoor opportunities that Greater Victoria offers by playing hockey, mountain biking, skiing and playing softball with his growing family.

To Craig, the biggest challenge facing the Greater Victoria water/wastewater system is the threat of privatization. He says he believes that "a move to privatization could well lead to a decline in the quality of our drinking water."
